## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 17 October 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 38-45, 51-62, 65, 67, 72-79, 82 and 83 are rejected under 35 U.S.C. 102(e) as being anticipated by Huebsch, et al.-5853422.

Huebsch discloses a device having expandable struts covered by a mesh or cloth covering, analogous to applicant's claimed endothelialization membrane. The struts are movable from a parallel configuration to a ramped configuration, see figs. 2-4. Barbs are present on each of the struts.

Claims 67, 68, 84, 85, 94 and 95 are rejected under 35 U.S.C. 102(b) as being anticipated by Uddin-'431.

Uddin discloses a device having expandable struts with a porous web stretched therebetween. Barbs are present on the ends of these struts.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 61-66, 72-83, 89-93 and 96-100 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uddin-'431 in view of Huebsch-'422.

Uddin discloses the invention as claimed with the exception of the materials of the mesh and struts.

Huebsch discloses said materials. It would have been obvious to have used the materials disclosed by Huebsch to make the analogous parts of Uddin's device, as these materials have been shown to be beneficial when constructing a medical device having the required flexibilities and porosities necessary to function as disclosed. As for the e-PTFE and the Dacron, these are merely deemed to be obvious alternatives of the disclosed materials which would have been known to one skilled in the art due to their known flexibility or porosity.

Art Unit: 3761

Claims 63,64,66,68-71,80,81 and 84-100 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huebsch-'422.

Huebsch discloses the invention as claimed with the exception of the claimed materials.

It would have been obvious to have used the claimed materials as alternatives to those specifically disclosed by Huebsch, as these materials would have been known to one skilled in the art to be beneficial when constructing a medical device having the required flexibilities and porosities necessary to function as disclosed. As for the e-PTFE and the Dacron, these are merely deemed to be obvious alternatives of the disclosed materials which would have been known to one skilled in the art due to their known flexibility or porosity.

### ***Response to Arguments***

Applicant's arguments filed 10-17-02 have been fully considered but they are not persuasive.

Uddin discloses in col. 4 lines 23-25 that the material of the membrane may be porous to filter fluids, thus disclosing a membrane capable of providing an endothelialization substrate.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3761

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
